Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “moving the energy delivery device away from the portion of collagen containing tissue at the selected site after delivering sufficient energy; and moving the energy delivery device back toward the portion of collagen containing tissue at the selected site, after moving away and sensing the elevated composite temperature due to the increased thermal energy in the fluid medium” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claims 90-93 and 95-100 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirwin in combination with Swanson et al ('184). Kirwin teaches a method of tissue shrinkage,

Art Unit: 3735

but does not teach measuring temperature. Swanson et al ('184) provide the teaching the desirability of determining the temperature of tissue to which energy is applied. It would have been obvious to the artisan of ordinary skill to provide the temperature detector configurations and methods of Swanson et al in the method of Kirwin, since this would allow the temperature to be maintained in the desired range more easily, which control will necessarily affect the depth to which the shrinkage effect occurs, or to employ the shrinkage method of Kirwin in the method of Swanson et al, since this would destroy the physiological functionality of the tissue, without removing it, or compromising its structural integrity, and in either case, to move the device away from the site and return it thereto, since this is well within the scope of one having ordinary skill in the art; is not critical; provides no unexpected result; and since the removal would allow the prostate shrinkage to be determined, so as to determine whether or not the shrinkage was sufficient, and the replacement would allow for further shrinkage, should it be deemed necessary by the physician, thus producing a method such as claimed.

Applicant's arguments with respect to claim\*\*\* have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3735

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
